PROJECTS

Feel Fresh App

March 2021

It's a service related app which provides you many services like Office cleaning, Construction Cleaning, Industrial Cleaning, Hospitality Cleaning, High Access Cleaning, Warehouse Cleaning etc.

- In this website, there is an Admin section. By login any Admin can easily add service as well as delete service.
- In this website, a user can take any service and share their opinion using a Review Button. This review will show in the Home page of this website.
- I also use a react router. So, it is easy to go one page to another page.
- There is also a private route. Which is useful for this website. Because of the private route we can set an authentication system on this website.

Technologies: HTML5, CSS3, JavaScript, NodeJS

Frameworks/Libraries: React, Express

Database: MongoDB

Live: <https://home-cleaning-app.web.app>

Code: <https://github.com/asmhasansarker/home-cleaning-app>

Hasan's Shop App

March 2021

It's an e-commerce website where a customer can buy a product easily. Customers can see all orders, he can cancel his ordered items also. On the other hand, an admin can manage all products, add new products also.

- Customers can see all orders, he can cancel his ordered items also.
- On the other hand, an admin can manage all products, add new products also.
- To use this website, at first you need to create an account using Name, Email and Password. You can also create your account using your Facebook or Google account.
